

ProKa 950L 10X

Microbial Fat, Oil & Grease Control

Primary Applications: Grease Traps, Drain Lines, Scum Pits, Wet Wells, Lifts Stations, Collection Systems, Equalization Tanks

Benefits: Fat, Oil and Grease (FOG) digestion and removal, reduce maintenance and odor issues associated with FOG accumulation

ProKa 950L-10X contains a concentrated, novel blend of naturally occurring, aerobic and facultative bacteria specifically formulated to breakdown and digest fats, greases, olefins, and vegetable oils suspended in wastewater. **ProKa 950L-10X** will work effectively in grease traps, scum pits, lift stations, wet wells and Flow Equalization tanks, facultative lagoons/basins and aeration basins. The bacteria produce a prolific amount of diverse enzymes that penetrate and process insoluble oils and fats under stressful environmental conditions. **ProKa 950L-10X** works under both aerobic and anoxic conditions. **ProKa 950L-10X** does not contain caustics or acids and will not harm pipes or wastewater equipment.

SPECIFICATIONS

Product: Bacterial cultures and or enzymes, surfactant
Bacterial Enzyme: Amylase, Protease, Lipase, Esterase, Urease, Cellulase, Xylanase
Viability: Minimum 2 billion CFU/ml
Form: Amber Liquid
Specific Gravity: 1.05
Storage: Store product in a dry place between 21°-27° C (70°-80.6°F), do not freeze
Shelf Life: One year when stored at 21°C (70°F)

DIRECTIONS FOR USE

Mix container thoroughly prior to blending or applying. For optimum performance, use **ProKa 950L-10X** at a 10% dilution in a finished product. **ProKa 950L-10x** may be applied upstream from the treatment area or directly to a grease trap, drain line, collection system or other wastewater equipment where FOG is a concern. Consult a 4G technical representative for specific application instructions.

OPERATING CONDITIONS

pH 4.25 -10.0
Temp. 5°C - 55°C (40°F - 130°F)

Do not use in environments where high levels of toxic metals such as zinc, chrome, mercury, are known to exist.
